

TikTok Ads Strategy

App Installs & User Acquisition Campaign

DeeX

Nigeria's All-in-One Digital Finance Platform

Campaign Overview

Objective:	App Installs + Signups
Target Market:	Nigeria (Ages 18-45)
Primary Platforms:	Android & iOS
Date:	April 2026

Executive Summary

DeeX is launching a targeted TikTok advertising campaign to drive app installs and user signups in Nigeria. This strategy leverages TikTok's massive Nigerian user base with creative, mobile-first content that resonates with our target demographic.

Campaign Goal

Acquire 10,000+ new app installs within the first month, with a target Cost Per Install (CPI) of less than N200 and a signup conversion rate above 30%.

1. Campaign Setup

Setting	Recommendation
Campaign Objective	App Promotion > App Install
Buying Type	Auction (lowest cost)
Daily Budget	N100,000 - N300,000
Bid Strategy	Lowest Cost with Cap
Optimization Event	App Install (Primary)

2. Targeting Strategy

Our primary audience consists of digitally-savvy Nigerians aged 18-45 who are actively engaged with fintech, crypto, and mobile payment solutions.

Demographics

Location	Nigeria (All states, prioritize Lagos, Abuja, PH, Kano)
Age Range	18 - 45 years
Gender	All
Device	Android (Primary), iOS

Interest Targeting

- * Cryptocurrency
- * Bitcoin
- * Investing
- * Gift Cards
- * Online Shopping

- * Mobile Banking
- * Sports Betting
- * Fintech Apps
- * E-commerce

3. Ad Group Structure

We will create 4 distinct ad groups, each targeting a specific use case and value proposition:

Crypto Traders

Angle: Beat bank rates

Hook: Sell your Bitcoin at the best Naira rate

Gift Card Sellers

Angle: Instant cash

Hook: Turn unused gift cards to Naira in 2 minutes

Bill Payments

Angle: No more delays

Hook: Pay PHCN, buy airtime, fund betting - all in one app

Virtual Cards

Angle: Shop globally

Hook: Get a USD virtual Visa card - no domiciliary needed

4. Creative Strategy

TikTok requires native, authentic content. Our creatives will follow proven formats that resonate with Nigerian users.

The 3-Second Hook Rule

Your first 3 seconds determine whether users keep watching. Start with bold text overlays, unexpected statements, or relatable pain points.

High-Performing Hooks

- * "Stop selling your crypto to scammers!"
- * "I just got N50,000 for my Apple gift card instantly"
- * "This app pays your Nepa bill in 10 seconds"
- * "How I made N20,000 sharing my referral link"

Content Formats

- * UGC-Style Testimonials: Nigerian creators showing real app usage
- * Before/After: Contrast old methods vs DeeX experience
- * Speed Demos: Timed challenges (e.g., pay electricity under 30 sec)
- * Referral Showcases: Real users sharing earnings
- * Trending Audio: Nigerian sounds + finance meme formats

5. Ad Formats

Format	Best For	Expected Performance
Spark Ads	Boosting organic creator content	High trust, best for conversions
In-Feed Ads	Primary conversion driver	Scale and volume
Collection Ads	Showcasing multiple features	Feature discovery
Playable Ads	Interactive app demo	Engagement & install quality

Recommended Approach

Start with Spark Ads featuring authentic Nigerian creators to build trust and social proof. Scale winning organic content before testing polished In-Feed ads.

6. Tracking & Attribution

Accurate tracking is essential for optimizing campaigns and measuring true ROI.

TikTok App Events SDK

Install the TikTok SDK in both Android and iOS apps to track user actions post-install.

Event Mapping

Event Name	Description	Priority
App Install	User installs DeeX app	High
App Launch	User opens the app	Medium
Registration	User completes signup	Primary KPI
Complete KYC	User finishes KYC verification	High
First Trade	User makes first crypto trade	Primary KPI
Purchase	Any bill payment or trade	Track

Deep Linking

Configure deferred deep links to send users directly to specific onboarding flows (e.g., crypto trading screen, referral bonus page) based on the ad they clicked.

7. Landing Experience

The post-click experience significantly impacts conversion rates.

Option A: Pre-Landing Page (Recommended)

Create a mobile-optimized landing page that educates users before sending them to app stores.

- * Headline: "Nigeria's All-in-One Crypto & Payment App"
- * Social Proof: "Join 2,800+ Nigerians trading on DeeX"
- * Promo Offer: "Get 100 DeeXPoints (N1,000) when you sign up"
- * Clear CTAs: Dual buttons for Play Store & App Store
- * Trust Badges: Security certifications, user count

Option B: Direct App Install

Send users directly to app stores. Optimize your store listings with screenshots showing crypto rates, gift card rates, bill payment UI, and rewards dashboard.

8. Budget Allocation

Phase-based budgeting allows for testing, learning, and scaling what works.

Phase	Duration	Budget	Focus
Testing	Week 1-2	N200K - N500K	Test 4-6 creative variations
Scaling	Week 3-4	N500K - N1M	Scale 2-3 winning ads
Retention	Ongoing	N300K/week	Retargeting funnel optimization

Budget Tip

Reserve 20% of your budget for retargeting campaigns targeting users who installed but haven't signed up or completed KYC.

9. Key Performance Metrics

Metric	Target	Tracking Method
Install Rate	> 2%	TikTok Ads Manager
Cost Per Install (CPI)	< N200	TikTok + App Analytics
Signup Rate	> 30%	App Events SDK
Cost Per Signup	< N600	Calculated from CPI
KYC Completion	> 20%	App Events SDK
First Trade Rate	> 10%	App Events SDK

10. Compliance & Trust

As a fintech company, building trust through transparency is crucial.

Required Disclaimers

All ad creatives must include appropriate disclaimers about crypto volatility, KYC requirements, and fee transparency. Avoid guarantees of returns.

Trust Signals to Include

- * "Licensed by CBN" (if applicable)
- * "Your BVN is secure - encrypted & verified"
- * Security badges in ad visuals
- * "3-tier KYC for your protection"
- * Customer support availability (WhatsApp, Email)

11. Sample Ad Script

Hook:

"POV: You finally found a legit app to sell your Bitcoin in Nigeria"

Script:

0-3s	Text overlay: "No more WhatsApp traders"
3-8s	Screen recording: Open app > Sell BTC > Get N rate
8-15s	"I sold \$500 BTC and got N750,000 in 5 minutes"
15-20s	"Plus gift cards, bill payments, virtual dollar cards"
CTA	"Download DeeX now - link in bio"

Launch Checklist

- Y Set up TikTok Business Account
- Y Install TikTok SDK in Android app
- Y Install TikTok SDK in iOS app
- Y Configure app events (Install, Signup, KYC, First Trade)
- Y Create 4-6 video creatives for testing
- Y Set up 4 ad groups with different angles
- Y Build landing page OR optimize app store listings
- Y Set daily budget and bidding strategy
- Y Configure retargeting audiences
- Y Set up tracking dashboard (TikTok + Analytics)
- Y Prepare compliance disclaimers
- Y Test deep links across devices
