Status: Draft

Date: July 2026

Product: DeeXOptions

Product Requirements Document

Field	Value
Version	1.0
Status	Draft
Date	July 2026
Product	DeeXOptions

1. Problem Statement

DeeXOptions needs a mechanism to incentivize new user acquisition and drive meaningful engagement (deposits and trades). Current growth is limited by lack of structured referral incentives. We need a system where existing users or marketing campaigns can bring in new users through invite codes that reward both acquisition and activation.

2. Solution Overview

An invite code system where:

- Admins create single-use invite codes with configurable conditions
- New users enter a code to claim DeeXpoint rewards
- Rewards are unlocked progressively as users complete conditions (deposit, trade)
- The system tracks referral relationships for future features
- Invite codes are accessible throughout the app, not just at signup

3. Definitions

Term	Definition
Invite Code	A single-use alphanumeric code entered by new users to claim conditional rewards
DeeXpoints	Platform reward points that can be redeemed for trading credits or other benefits
Inviter	An existing user or campaign that shares an invite code
Invitee	A new user who enters and redeems an invite code
Conditions	Requirements that must be met before rewards are credited (e.g., deposit, trade)

4. User Roles

Role	Description
Admin	Creates and manages invite codes, views analytics
Inviter	Existing user who shares invite codes with potential new users
Invitee	New user who enters an invite code and works toward unlocking rewards

5. User Stories

5.1 Admin Stories

ID	Story	Priority
A1	As an admin, I want to create invite codes with custom conditions so that I can control reward distribution	Must Have
A2	As an admin, I want to set minimum deposit and trade amounts for each code so that only qualifying users receive rewards	Must Have
A3	As an admin, I want to set optional expiry dates on codes so that time-limited campaigns can be managed	Should Have
A4	As an admin, I want to restrict codes to specific trading pairs so that I can promote certain	Could Have
A5	As an admin, I want to view redemption and completion rates so that I can measure campaign effectiveness	Must Have
A6	As an admin, I want to deactivate active codes so that campaigns can be stopped if needed	Must Have
A7	As an admin, I want to bulk generate codes with the same conditions so that large campaigns can be launched quickly	Should Have
A8	As an admin, I want to assign codes to specific inviters so that I can track individual referral performance	Should Have

5.2 Inviter Stories

ID	Story	Priority
I1	As an inviter, I want to view my unique invite code so that I can share it with others	Must Have
I2	As an inviter, I want to see who used my code and what rewards they claimed so that I can track my referrals	Should Have
I3	As an inviter, I want to share my code via link or QR code so that the process is seamless	Should Have

5.3 Invitee Stories

ID	Story	Priority
E1	As an invitee, I want to enter an invite code at signup so that I can claim rewards	Must Have
E2	As an invitee, I want to enter an invite code after signup (dashboard, deposit, trade pages) so that I am not locked out if I skip it initially	Must Have
E3	As an invitee, I want to see a clear breakdown of conditions and rewards so that I know what actions unlock what	Must Have
E4	As an invitee, I want to see my progress toward completing conditions so that I am motivated to continue	Must Have
E5	As an invitee, I want to receive notifications when I earn rewards so that I am aware of my progress	Should Have
E6	As an invitee, I want to see how many DeeXpoints I have earned from the invite code so that I understand my benefits	Must Have

6. Acceptance Criteria

6.1 Admin Creates Invite Code

Given an admin is on the invite code management page

When the admin clicks "Create New Code"

Then the admin can configure:

- Code string (auto-generated or custom)
- Reward type: DeeXpoints
- Total reward amount
- Deposit reward amount
- Trade reward amount
- Minimum deposit amount required
- Minimum trade amount required
- Required trading pairs (optional)
- Deposit deadline in days (optional)
- Trade deadline in days (optional)
- Expiry date (optional)
- Assigned inviter (optional)

And the code is created with status "active"

And the code is unique and does not conflict with existing codes

6.2 Invitee Enters Code at Signup

Given a new user is on the signup page with a valid invite code pre-filled

When the user completes registration

Then the invite code is associated with the user's account

And the user sees a confirmation: "Invite code applied! Complete conditions to earn rewards"

And the reward breakdown is displayed on the dashboard

6.3 Invitee Enters Code After Signup

Given a logged-in user without an applied invite code

When the user navigates to any of the following:

- Dashboard
- Deposit page
- Trade page
- Profile/Settings
- Wallet page

Then a prompt to enter an invite code is visible

Given a user without an invite code completes signup

When the user reaches the dashboard for the first time

Then a modal appears: "Have an invite code? Enter it here to claim rewards"

And the modal is dismissible

And the modal does not appear again once dismissed (unless user navigates to enter code manually)

6.4 Conditions Display and Progress Tracking

Given an invitee has a valid invite code applied

When the user views their dashboard or invite code status page

Then the following conditions are displayed:

- Registration: Completed (with checkmark)
- Deposit: Status (completed/pending) with amount requirement and reward
- Trade: Status (completed/pending) with amount requirement and reward

And partial rewards are credited as each condition is completed

And the progress is updated in real-time

6.5 Deposit Condition Met

Given an invitee has a valid invite code with a deposit condition

When the user makes a deposit equal to or greater than the minimum required amount

Then the deposit reward (DeeXpoints) is credited to the user's account

And the deposit condition is marked as completed

And the user receives a notification: "You earned X DeeXpoints for your first deposit!"

6.6 Trade Condition Met

Given an invitee has a valid invite code with a trade condition

When the user completes trades with total volume equal to or greater than the minimum required amount

Then the trade reward (DeeXpoints) is credited to the user's account

And the trade condition is marked as completed

And the user receives a notification: "You earned Y DeeXpoints for trading!"

Given the invite code has required trading pairs specified

When the trade condition is evaluated

Then only trades on the specified pairs count toward the minimum volume

6.7 Code Expiry

Given an invite code has an expiry date set

When the current date passes the expiry date

Then the code status changes to "expired"

And the code can no longer be redeemed

And if a user was mid-redemption, their pending rewards are forfeited

6.8 Code Already Used

Given an invite code has already been redeemed by a user
When another user attempts to enter the same code
Then the system displays: "This code has already been used"
And the code is not applied to the new user's account

6.9 Admin Deactivates Code

Given an admin is viewing an active invite code
When the admin clicks "Deactivate"
Then the code status changes to "deactivated"
And the code can no longer be redeemed
And users who mid-redemption retain any already-credited rewards

6.10 Admin Views Analytics

Given an admin is on the analytics dashboard
When the admin selects the invite code analytics view
Then the following metrics are displayed:

- Total codes created (by status)
- Redemption rate (codes used / total codes)
- Deposit completion rate
- Trade completion rate
- Total DeeXpoints distributed
- Top inviters by successful referrals

6.11 Inviter Shares Code

Given an inviter is on the "Invite & Earn" page
When the inviter views their code
Then the following sharing options are available:

- Copy code to clipboard
- Share via link (with embedded code)
- Generate QR code

Given an inviter shares a link
When a new user clicks the link
Then the user is directed to the landing page with the code pre-filled

6.12 Inviter Views Referral Status

Given an inviter is on the "Invite & Earn" page
When the inviter views their referral history

Then the following information is displayed for each invitee:

- Invitee username or ID
- Date code was redeemed
- Conditions completed (deposit, trade)
- Rewards credited

7. Rewards Configuration

Reward Component	Description
Deposit Reward	DeeXpoints credited when invitee completes minimum deposit
Trade Reward	DeeXpoints credited when invitee completes minimum trade volume
Total Reward	Sum of deposit and trade rewards

Constraint: Total reward = Deposit Reward + Trade Reward. Both must be set when creating a code.

8. Conditions Configuration

Condition	Description	Required
Minimum Deposit Amount	USD equivalent of minimum deposit required	Yes
Minimum Trade Amount	USD equivalent of minimum trade volume required	Yes
Required Trading Pairs	Restrict trade condition to specific pairs (empty = any pair)	No
Deposit Deadline	Days from signup to complete deposit	No
Trade Deadline	Days from signup to complete trade	No
Expiry Date	Date after which code can no longer be used	No

9. Non-Functional Requirements

Requirement	Specification
Code Uniqueness	All invite codes must be unique across the system
Rate Limiting	Invite code validation endpoint limited to 5 attempts per minute per IP
Audit Logging	All admin actions (create, deactivate) must be logged
Performance	Code validation response time < 200ms
Scalability	System must support up to 100,000 active codes

10. Notifications

Event	Recipient	Message
Code redeemed	Inviter	"Someone used your invite code!"
Deposit completed	Invitee	"You earned X DeeXpoints for your first
Trade completed	Invitee	"You earned Y DeeXpoints for trading!"
Code expired	Admin	"X codes expired without use"
All conditions met	Invitee	"Congratulations! All invite rewards claimed!"
Reminder (24h)	Invitee	"Don't miss out! Enter your invite code for rewards"

11. Success Metrics

Metric	Target	Measurement
Code Redemption Rate	> 40%	Codes used / Codes created
Deposit Completion Rate	> 60%	Users who deposited / Users who redeemed code
Trade Completion Rate	> 50%	Users who traded / Users who deposited
Inviter Engagement	> 30%	Existing users who share codes
Cost Per Acquisition	Within marketing budget	Total rewards distributed / New users acquired

12. Future Enhancements (v2)

Enhancement	Description
Recurring Rewards	Rewards for ongoing trading activity beyond first trade
Social Sharing	Deep links for WhatsApp, Twitter, Telegram
Leaderboards	Top inviters rankings
Campaign Codes	Holiday/special event themed codes
A/B Testing	Test different reward amounts and conditions
Referral Commissions	Ongoing % of referee's trading fees (separate from invite codes)

13. Open Questions

- Should there be a maximum cap on total DeeXpoints distributable per campaign?
- Can an inviter have unlimited unique codes or should there be a limit?
- Should the inviter receive any reward when their invitee completes conditions?
- What happens to pending rewards if a code expires after redemption but before all conditions are met?
- Should there be a manual override for admins to credit points in edge cases?
- How should the invite code system interact with the future referral code system?

14. Implementation Timeline

Phase	Duration	Scope
Phase 1	2 weeks	Backend: Database schema, API endpoints, condition logic
Phase 2	1 week	Admin Panel: Code creation, management, bulk generate
Phase 3	1 week	User Flow: Code validation, redemption, progress tracking
Phase 4	1 week	Frontend: Landing pages, dashboard prompts, banners
Phase 5	1 week	Analytics: Dashboard, reporting, metrics
Total	**6 weeks**
